

# KSHITIJ SRIVASTAVA

MS

Director of Technology

[kshitij.srivastava@milliman.com](mailto:kshitij.srivastava@milliman.com)

## Current Responsibility

Kshitij leads technology and data operations for the Life and Annuity Predictive Analytics practice in Chicago. Kshitij's work includes data infrastructure management, data pipeline development and security operations for Milliman's industry leading experience studies for VA, FIA, RILA and Life products. Kshitij also leads the development of Milliman Recon platform used by Milliman study subscribers and contributors. Kshitij's work with Milliman clients also include leading data operations and actuarial modernization initiatives that have been outsourced to Milliman. Kshitij routinely consults with actuarial and data teams within the industry and advises on cloud migration, actuarial modernization, AI, and data governance topics.

## Professional Work Experience

At Milliman, Kshitij's work encompasses data platform management, actuarial product development and applying machine learning/advanced analytics to actuarial use cases particularly in areas of policyholder behavior. Kshitij also leads a multidisciplinary team focusing on data engineering, devops, information security, software development and testing.

Prior to joining Milliman, Kshitij has worked as a consultant focusing on machine learning and software development for a major analytics services company and as a data scientist for a major technology company.

## Education

Master's degree - Computer Science (Major in Machine Learning)
